

VAN RODOLF M. SULIVA

vmsuliva.online | 0966 761 8197 | vansuliva4@gmail.com

TECHNICAL SKILLS

Programming: Python, PHP, JavaScript, Java

Backend & APIs: Django REST Framework, Flask, Laravel, REST APIs

Frontend & Mobile: React, React Native

Databases: PostgreSQL, MySQL, SQLite

AI & Machine Learning: OpenAI API, Gemini API, Claude, LLM Integration, Prompt Engineering, Computer Vision, Pose Estimation, AI-Assisted Application Development

DevOps & Cloud: Docker, Linux, Git, GitHub, Google Cloud Run

IoT & Platforms: Raspberry Pi, Arduino, MQTT, Google Maps Platform

Developer Tools: Codex, Claude Code

EXPERIENCE

Software Developer Intern

Municipal Agriculture Office | Ramos, Tarlac | February 2026 - May 2026

- Built and deployed AgriGOV, a Laravel and MySQL agriculture information system supporting 150+ farmer and land records across farmer registration, agricultural assistance, animal-health services, cooperatives, and machinery management.
- Implemented role-based access across 70+ protected workflows, enforcing municipality-level data separation and province-scoped oversight, with audit trails for record changes.
- Developed interactive GIS parcel mapping, KML/KMZ imports, QR-enabled farmer registry cards, dashboards, and Excel/CSV reporting to support field operations and consolidated reporting.audit trails, and Excel/CSV reports, supporting 150+ farmer and land records across 70+ secured workflows.

Freelance Software Developer

Self-Employed | 2024 – September 2026

- Developed and delivered 10+ web and mobile applications for clients, handling requirements, UI/UX, development, testing, deployment, and maintenance from end to end.
- Built full-stack solutions using REST APIs, relational databases, authentication, reporting, and cloud hosting, helping clients digitize workflows, improve operational efficiency, and establish reliable production-ready systems.

EDUCATION & ACHIEVEMENTS

Bachelor of Science in Information Technology - Network and Administration

Tarlac State University | August 2022 - July 2026

- Magna Cum Laude
- Best Capstone Project, 2026 - PGT Onboard
- 3rd Place, Saliksiklaban University-wide Undergraduate Research Competition, STEM Category, 2026 - Digital Transformation of Public Transport: Vehicle Tracking and Electronic Payment Solutions (PGT Onboard)

SELECTED PROJECTS

PGT Onboard - Public Transport Tracking and Electronic Payment System

- Developed an award-winning React Native, Flask, MySQL, and IoT platform with 120+ REST API routes and four role-based workflows, integrating real-time GPS/ETA, MQTT passenger counting, QR e-ticketing, and a closed-loop wallet.

- Piloted across 3 minibuses (23 seats each) and validated by 69 stakeholders plus 3 IT professionals; recorded 0.71-minute average ETA variance, correct APC counts at 8 of 10 stops, and a 4.70/5 commuter usability score.

AgriGOV — Agriculture Information and GIS Management System

Continued development after internship | June 2026 – Present

- Extended the Laravel/MySQL platform with a **farmer self-service portal** for viewing personal records, mapped parcels, seasonal crops, and assistance history.
- Integrated **Copernicus Sentinel-2 imagery and NDVI analysis** to display parcel vegetation maps, observation dates, and greenness statistics with plain-language explanations and cloud-data limitations.
- Enhanced **GIS parcel visualization and QR-enabled farmer registry cards**, with municipality-scoped access and public verification pages that exclude sensitive internal records.

Garden of Peace - GIS Cemetery Mapping and Tracking System

- Created a GIS cemetery system with digital grave mapping, QR-enabled records, plot management, and shortest-path navigation using Dijkstra's algorithm.

FitQuest - Gamified Fitness Application with Motion Tracking

- Built a mobile fitness application with pose estimation, exercise and progress tracking, adaptive rewards, leaderboards, and AI-generated coaching feedback.

CTS Pacific – Telecommunications & Infrastructure Website

- Designed in **Figma** and developed a responsive company website using **React, Next.js, and Supabase** for a Guam-based telecommunications contractor.

- Organized technical services into clear navigation and inquiry workflows, improving service discovery and giving the company a stronger professional digital presence.

CERTIFICATIONS

Cisco Networking Academy | 2024–2025

Junior Cybersecurity Analyst Career Path; Cyber Threat Management; CCNA: Introduction to Networks; CCNA: Switching, Routing and Wireless Essentials; CCNA: Enterprise Networking, Security and Automation

Department of Information and Communications Technology (DICT) – Cordillera Administrative Region | 2026

Freelancer Stakeholders Enablement – ICT Industry Development Bureau
